

Tingle Tidbits

Summer 1923

Dear Prayer and Share Partners,

Another year behind me and I am reminded of something Mark Twain said: “Age is an issue of mind over matter. If you don't mind, it doesn't matter.”

But I like much better what I read in the last part of 2 Corinthians 4:16 (TLB).
“That is why we never give up. Though our bodies are dying, our inner strength in the Lord is growing every day.”

Our Spanish Bible correspondence courses continue to reach into new areas. Recently we had two new enrollments from the Dominican Republic.

Also, your generous donations to our Academia are making it possible for more prisoners to study God's Word. Thank you so much. (ACA prayer calendar included.)

The salt air from the Gulf of Mexico is really damaging to our towers here in the lower valley of Texas. Our tower in Brownsville has to be completely replaced. The ones who inspected (pictures below) our 1,200-foot tower for KVMV, our 100,000 watt station here in Pharr, found that several entire sections have to be replaced.

Please help us pray for the safety of the tower crew that will be doing this major task. Also, less strong winds would be a great blessing for the work that high up.

May God continue to bless you richly for your continued faithful prayers and support as I continue to serve here with World Radio Network / Inspiracom.

Love and Prayers,

Florence Tingle
